The board was reminded to review these procedures to help streamline the file review process. Additionally, there were other concerns that required legal consultation on how to address them.</p> <p>D. Calvo asked B. Hattori to clarify the involvement of a particular individual in the matter and to determine what actions they had taken, as they could potentially serve as witnesses in any further investigations. # Proposed Issuance of Underground Injection Control System Operating Permits for Nissan Motor Corporation In Guam

Public Review and Comment Period: March 27, 2025 - April 28, 2025

The Guam Environmental Protection Agency (Guam EPA) runs the Underground Injection Control (UIC) Program, as mandated by the Safe Drinking Water Act, and approved by U.S. EPA.

The Agency regulates all applicable activities as set forth in the Guam's UIC Regulations. The UIC Program requires operating permits for all existing injection wells/systems. This includes wells built prior to the approval of the regulations are still in operation, and wells/ systems constructed after the effective date of the regulations.

Guam EPA has received renewal applications from Nissan Motor Corporation, for five (5) injection systems located in their parking lots at North Marine Corps Drive, Tamuning. The facility is a car dealer with parts, service and repair shops and a subsurface drainage systems within the parking areas.

On the basis of a preliminary UIC requirement review, the Administrator has proposed issuing UIC permits to allow discharges of stormwater runoff into the injection systems.

The discharges contain stormwater runoff only. No industrial discharges or any discharges are allowed into the systems.

The permits for these applications will require:

- 1 - Only stormwater runoff to be discharged into the injection systems
- 2 - Semi-annual monitoring of water quality for MBAS, Oil and Grease, N03-N, Endrin, Lindane, Toxaphene, 2, 4-D, 2, 4, 5-TP Silvex, Heptachlor, Methoxychlor, Lead, Benzene, Ethylbenzene, Xylene, Toluene, MTBE, Boron, COD, and pH;
- 3 - Assurance regarding repairs, replacement, or abandonment of the wells/systems in the event of failure;
- 4 - A laboratory analysis report of runoff water taken from the designated sampling point of the systems; and
- 5 - Compliance with other UIC requirements.

A copy of the Draft Permits and Permit Applications for the above applicant and all other supporting document are available for public inspection from 8 a.m. until 5 p.m. Monday through Friday at the Water Resources Management Program Section of the Water Division, Guam Environmental Protection Agency, located at 17-3304 Mariner Ave., Tiyán, Barrigada 96913.

For more information, contact Ms. Susan Marquez, at (671) 598-4778 or (671) 598-4751.

Written comments on the draft permits may be hand delivered or mailed to the address below. Comments must be received by Guam EPA no later than 5 p.m., MONDAY, APRIL 28, 2025. No fax submissions will be accepted.

If there are no appeals, the Draft Permits becomes final. Operation of the injection systems identified by the applicant may proceed subject to the conditions of the permits and other applicable legal requirements.

The final decision to set conditions and issue the final permits or deny application for the permits will be decided after all comments have been considered. If no comments are received within the 30-day waiting period, the final permits shall be issued immediately after the commenting period closes.

Please bring this information to the attention of all persons who may be interested in this matter.
